

A national repository for research data

Share, discover, and reuse data from all disciplines

www.dataverse.no

What is DataverseNO ?

-  Generic repository for open research data
-  National (managed by UiT)
-  Free - to deposit & reuse data
-  Runs on [Dataverse](#) - open-source platform
-  Local support and data curation at the library
-  Your dataset = citable research output (DOI)
-  [CoreTrustSeal-certified](#) (currently being renewed)

For whom is DataverseNO ?

Researchers **depositing** data Researchers **reusing** data

-  For people affiliated with Norwegian research institutions

-  1 data author

-  Data that can be openly published

-  Contact the local support team

-  Anyone

-  But look at the terms for reuse

-  Contact the library

Sharing data - what's in it for me?

Meet data sharing requirements

Keep your data safe in the long term

Get cited & gain visibility

Make your data FAIR

Build trust in research

Benefits of using DataverseNO

Curated

-  A local team member will look over your data
-  You will receive feedback to make it more FAIR
-  We're happy to help!

Peer review friendly

-  Can be shared with peer reviewers
-  Possibility of an anonymous version of your dataset

Free

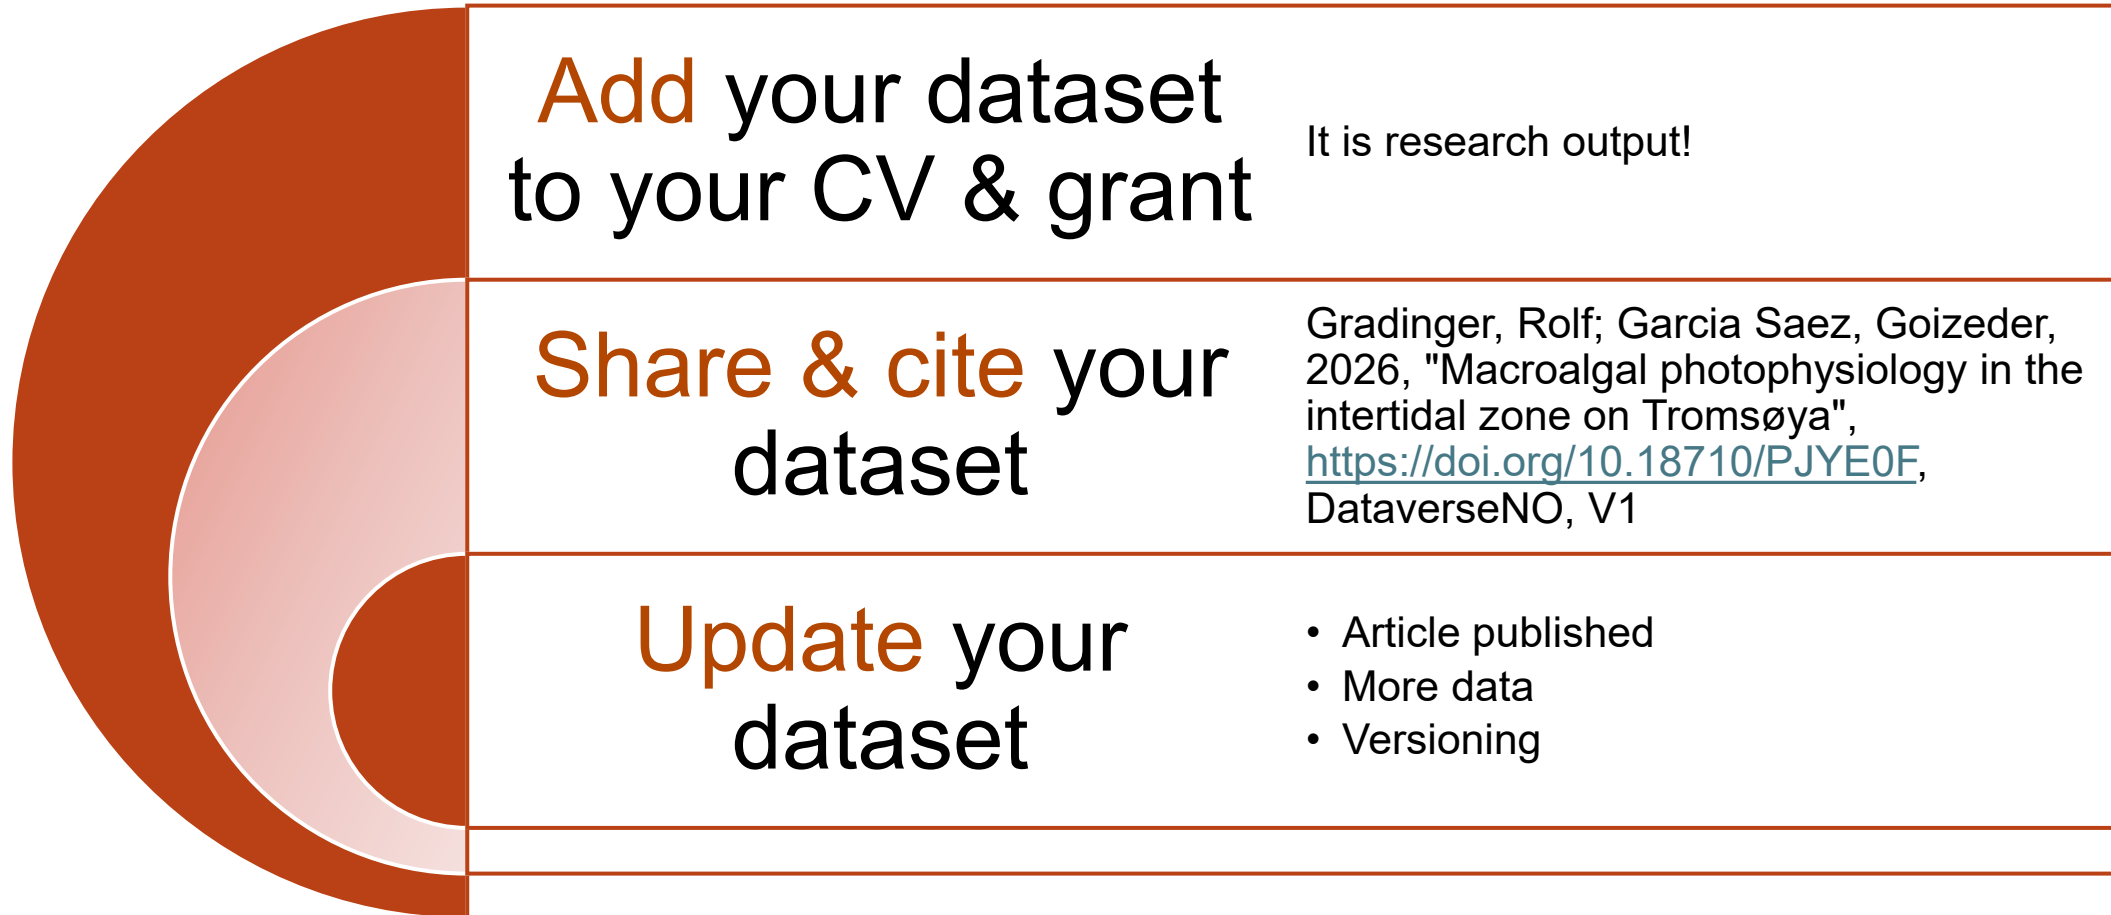

-  For people affiliated with Norwegian research institutions

Fulfill data sharing requirements
(RCN, EU)

How to

- ⌘ **Step 1:** prepare your data ([User Guide](#) and [ReadMe template](#))
- ⌘ **Step 2:** create a profile on DataverseNO
- ⌘ **Step 3:** create a new dataset
- ⌘ **Step 4:** fill out the metadata
- ⌘ **Step 5:** upload your files
- ⌘ **Step 6:** submit & wait for feedback

After your dataset is published
